

6. Get Your Mind Right

Universal Survival Law Four:

**Two new skills, one new habit
every 30 days: (2/1/30).**

Earlier we talked about language. Successful people do not let self-defeating language stand in their way because it works to limit or destroy their life, freedom and future economic opportunity. If we were to tell you that successful young adults are born and not made, we'd be lying. Like every successful person in this world you have to overcome barriers to make it.

The trick is to get into the right mindset. Analyze the situation and come up with a solution that always promotes your life, freedom and future economic opportunity. Think about what is standing in the way of you mastering a making it mindset. What would you have to do to get your mind right?

The rich will get richer and the poor will get poorer, and in the final hour many heads will lose power. What does the rich versus the poor really mean? Psychologically it means you got to pick your team. When someone says the rich gets richer, visualize wealth and put yourselves in the picture. The rich get richer cause they work towards rich, the poor get poorer cause their minds can't switch- from the ghetto let go, it's not a novelty, you could love your neighborhood without loving poverty.
